PROFESSIONAL SUMMARY

Driven and results-oriented tech professional with a strong foundation in computer science and hands-on experience in full-stack development. Proficient in C, Java, Python, and JavaScript, with expertise in React.js, Node.js, MongoDB, and Spring. Skilled in DevOps practices, including CI/CD, containerization, and cloud deployment. Adept at writing clean, scalable code and managing end-to-end project lifecycles. Proven leadership in collaborative team environments. Final-year project: ML-powered Smart Agriculture system to optimize industry practices and drive innovation.

Professional EXPERIENCE

INTERNSHIP (Evolve NASTP)

Dec 2024 – Feb 2025

- Built intuitive and interactive front-end interfaces using React.js, incorporating modern technologies like JSX, React Hooks, and React Router.
- Ensured seamless cross-browser compatibility and responsiveness by following best practices in CSS3, SCSS, Tailwind CSS, Bootstrap, and Material UI.
- Incorporated third-party libraries (e.g., Chart.js, Material-UI, and Ant Design) to provide rich user experiences and extend application functionality.

PROJECTS

SMART Agriculture AI & ML

- Developed a **Smart Agriculture Model** trained using **AI and CNN** for efficient crop monitoring and disease detection.
- Designed an **AI-powered Rice Disease Detection System** to identify and classify diseases in rice crops, improving yield and sustainability
- Built an **AI Chatbot** in a local language to assist farmers with real-time guidance and support
- Implemented a **Farm Management System** to optimize resource utilization and automate key agricultural processes.
- Developed a React.js frontend for an intuitive user experience, built a Spring Boot backend for scalable data processing and API management, and integrated Agrovista AI for precision farming and actionable insights.

NimbusNotes

- Technologies that are used in this project are React, Node.js, Express.js, MongoDB.
- Developed iNotebook, as a cloud-based note-taking application with user authentication and CRUD functionalities.
- The full-stack application was built using the MERN stack (MongoDB, Express, React, and Node.js), allowing users to create, edit, and delete notes in a secure environment

E-Commerce Website

- Technologies that are used in this project are Spring Boot, Oracle Database, SQL, HTML, CSS.
- Developed e-commerce website for grocery, fruits, and cosmetic items as part of a course project for Database Systems.
- Implemented user authentication, product management, and order processing, integrating a Spring Boot backend Oracle

EDUCATION

Bachelor in Software Engineering

FAST NUCES Karachi

TECHNICAL SKILLS

- **Frontend:** React.js, Nodejs, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS,
- **Backend:** Java Spring Boot, Node.js, REST APIs,
- **Database:** MongoDB, PostgreSQL, MySQL
- **DevOps & Cloud:** Docker, Kubernetes, CI/CD Pipelines, Jenkins, GitHub Actions
- **Version Control:** Git, GitHub
- **Methodologies:** Agile, Scrum, Test-Driven Development (TDD), Continuous Integration/Continuous Deployment (CI/CD)
